Necklace with GemDuo bail and bead
substitutes by Leslie Rogalski

Cymbal[™]
metal fashion elements[™]

BEADSMITH EXCLUSIVE

Cymbal is a unique, imaginative, and groundbreaking family of metal elements to fit and integrate with the most popular beadworking beads in the market. These include Czech GemDuo™, SuperDuo®, Silky®, Honeycomb®, Paisley Duo®, Ginko®, Kite® and Chevron Duo™ beads, as well as Miyuki Tilas, 11/0 Delica & Rounds and 8/0 Round seed beads. For 2022, we added Bails and Pendants to the Cymbal line along with new elements for most of the current bead shapes.

Cymbal™ Metal Fashion Elements™ have different functions:

BEAD ENDINGS™ serve as clasps or endings to attach clasps. They are shaped and spaced to the specifications of a specific bead.

SIDE BEADS™ give metal definition to the edge of a bead component or design.

BEAD SUBSTITUTES™ are metal elements created in the shape of a specific bead to be stitched into a project just like the bead itself. Bead Substitutes add shine, glitter and pop wherever they are used.

CONNECTORS can serve as links and extensions to your project. They add the richness of metal and create a mixed media effect.

EARRINGS are ready-to-bead metal post components. They are perfectly fashioned for your favorite shaped beads. Earring posts are made from hypoallergenic titanium.

BAILS are ready-to-bead metal elements designed to integrate into a piece of beadwork and then accommodate a rope, cords, or chain. Their diameter will accommodate multi strands, cords of varied thickness or a beaded kumihimo rope.

PENDANT SETTINGS are simple to customize, metal pendants. Affix beads with adhesive inside these bezel elements (viscous glue suggested) to wear alone or as elements or charms in any designs.

Experienced bead workers will have a fun and exciting time discovering new ways to use Cymbal™ elements.
