Beading needle and thread

Difficulty: Beginner/intermediate

## Large bead

(finished size approx. 25x30 mm)

1) String one 15/0, one 8/0, one 15/0 and one GD.

2) Repeat ten more times (so you have total 11 GDs, 11 8/0s and 22 15/0s).

3) Slide all the beads to the end of the thread and tie a square knot to form a circle. Then pass through the upper hole of the nearest GD bead.

4) Add one 15/0, one 8/0 and one 15/0, then pass through the upper hole of the next GD bead.

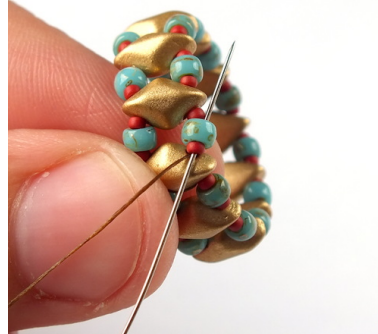

5) Repeat step 4 (Keep your tension very tight - the beads should start forming a ring) ...

6) ... until you reach the end of the row.

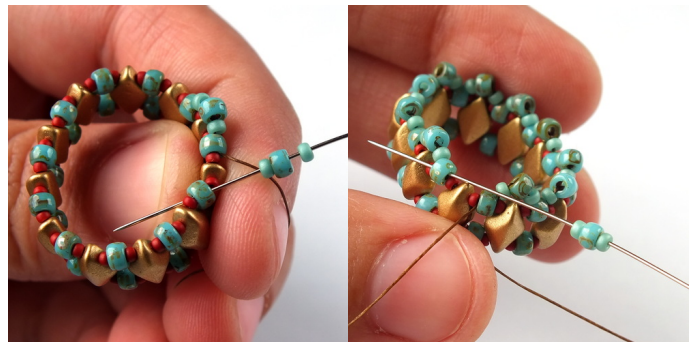

7) Make the step-up by passing through the first 15/0 and 8/0.

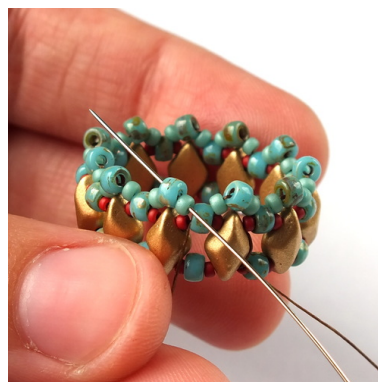

8) Add one 11/0, one 8/0 and one 11/0, then pass through the next 8/0 in the row.

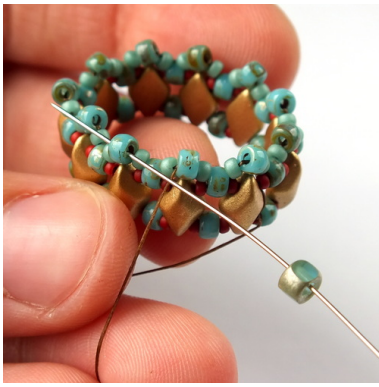

9) Repeat step 8, until you reach the end of the row.

10) Make the step-up by passing through the first 11/0 and the first 8/0 in the row.

11) Add one 6/0 and pass through the next 8/0 in the row.

16) ... until you reach the end of the row.

At the end of the row add one last Miniduo and then pass through the last 6/0 and then through the lower hole of the first Miniduo ...

12) Repeat step 11 ...

17) ... and then pass back through the upper hole of the same Miniduo.

13) ... until you reach the end of the row. At the end of the row add one last 6/0, then pass through the last 8/0 in the previous row and then through the first 6/0 in this row.

18) Add one new Miniduo and then pass through the upper hole of the next Miniduo in the row.

14) Add one Miniduo and pass through the next 6/0 in the row.

(You can put the core bead inside in this step.)

19) Repeat step 18 ...

15) Repeat step 14 ...

20) ... until you reach the end of the row. At the end of the row pass through the upper hole of the last Miniduo from the previous row and then through the lower hole of the first Miniduo from this row ...

21) ... and then finish the step-up by passing back through the upper hole of the same Miniduo.

26) Repeat step 25, until you reach the end of the row.

22) Weave through the upper holes of all the 11 Miniduos from the last row.

27) Weave through beads to get to one of the 8/0s on the opposite side of the base ring.

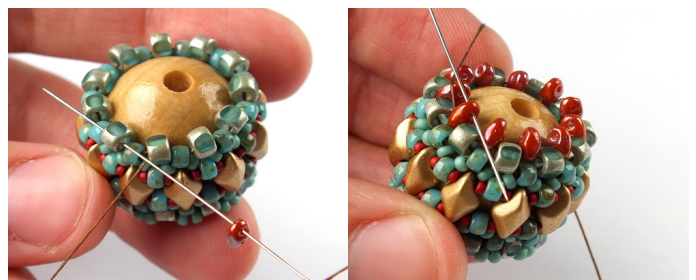

23) Optionally you can weave through these beads few more times.

28) Repeat steps 8 - 26 on the other side of the bead.

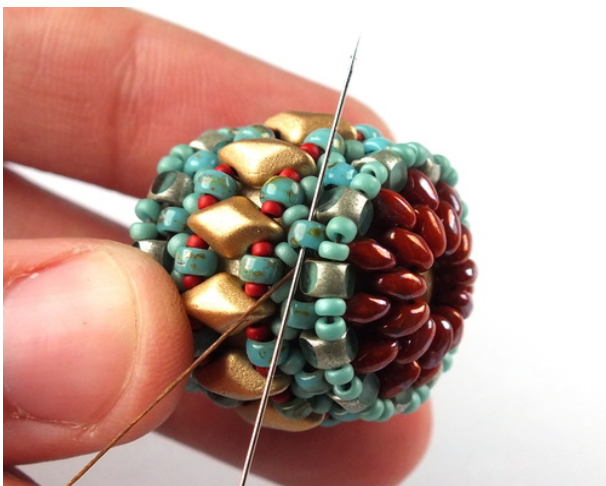

24) Weave through beads to get to one of the 6/0s.

25) Add two 11/0s and pass through the next 6/0 in the row.

29) Weave through beads to get to one of the 8/0s between the 6/0s.

30) Add four 15/0s, one 11/0, one 8/0, one 11/0 and four 15/0s and pass through the next 8/0 between the 6/0s on the other side of the bead.

31) Add four 15/0s, one 11/0, one 8/0, one 11/0 and four 15/0s and pass through the next 8/0 between the 6/0s on the other side of the bead.

32) Repeat steps 30 and 31, until you reach the end of the row. The thread should exit from one of the 8/0s.

33) Add four 15/0s and one 11/0 and then pass through the "middle" 8/0 from the nearest loop.

34) Add one 11/0 and four 15/0s and pass through the next "free" 8/0 between the 6/0s on the other side of the bead.

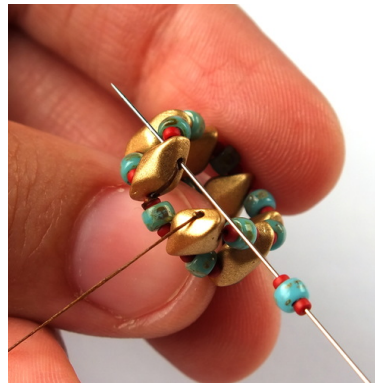

35) Repeat step 33 ...

36) ... and step 34 ...

37) ... until you reach the end of the row.  
The bead is finished. Tie a few half-hitch knots and cut off all the remaining thread.

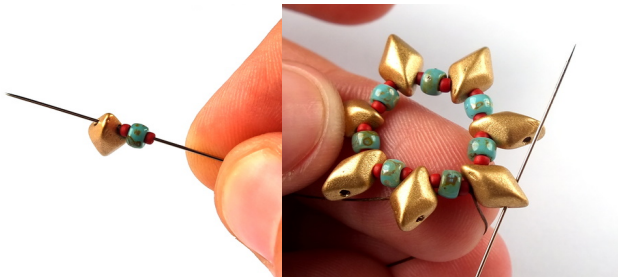

4) ... until you reach the end of the row.

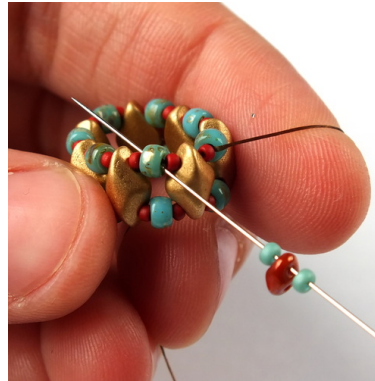

### Small bead

(finished size approx. 15x20 mm)

1) String one GD, one 15/0, one 8/0 and one 15/0. Repeat six more times (so you have total 7 GD beads, 7 8/0s and 14 15/0s). Slide all the beads to the end of the thread and tie a square knot to form a circle. Then pass through the upper hole of the nearest GD.

5) Make the step-up by passing through the first 15/0 and 8/0.

6) Add one 11/0, one Miniduo and one 11/0 and pass through the next 8/0 in the row.

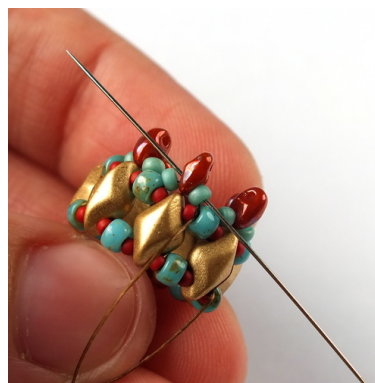

2) Add one 15/0, one 8/0 and one 15/0 and pass through the upper hole of the next GD bead.

7) Repeat step 6, until you reach the end of the row.

3) Repeat step 2 ...

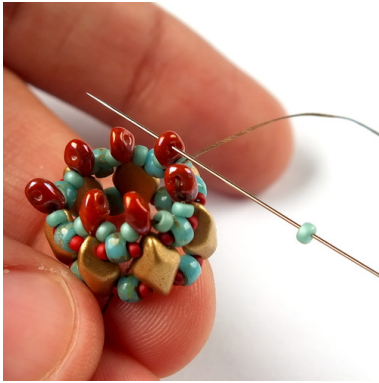

8) At the end of the row make the step-up by passing through the first 11/0 and through the lower hole of the first Miniduo ...

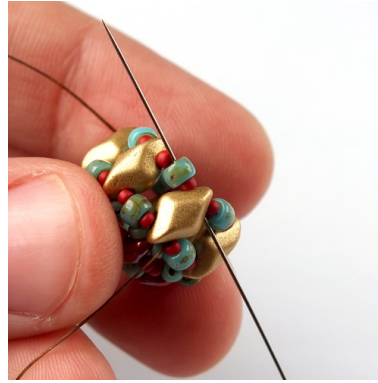

9) ... and then back through the upper hole of the same Miniduo.

14) Repeat step 13, until you reach the end of the row.

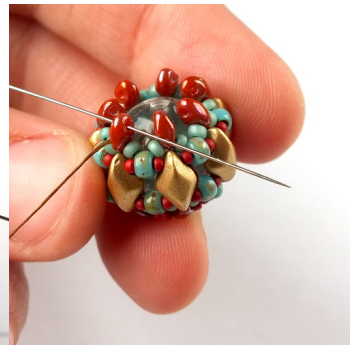

10) Add one 11/0 and pass through the upper hole of the next Miniduo.

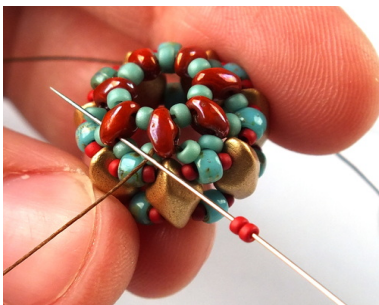

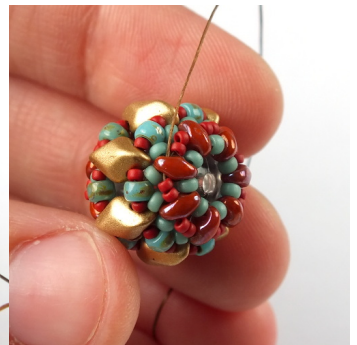

15) Weave through beads to get to one of the 8/0s on the other side of the bead.

11) Repeat step 10, until you reach the end of the row. Optionally you can weave through this row few more times.

16) Put the core bead inside and then repeat steps 6 - 15 on the other side of the bead.

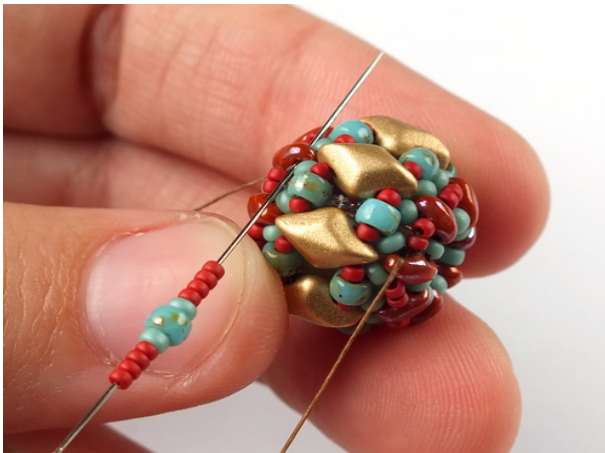

12) Pass back through the lower hole of the same Miniduo the thread is exiting from.

13) Add two 15/0s and pass through the lower hole of the next Miniduo in the row.

17) The thread exits from the lower hole of one of the Miniduos.

Add four 15/0s, one 11/0, one 8/0, one 11/0 and four 15/0s and pass through the lower hole of the next Miniduo on the other side of the bead.

18) Add four 15/0s, one 11/0, one 8/0, one 11/0 and four 15/0s and pass through the lower hole of the next Miniduo on the other side of the bead.

19) Repeat steps 17 and 18, until you reach the end of the row.

20) Add four 15/0s and one 11/0 and then pass through the "middle" 8/0 from the nearest loop.

21) Add one 11/0 and four 15/0s and pass through the lower hole of the next Miniduo on the other side of the bead.

22) Repeat steps 20 and 21 ...

23) .. until you reach the end of the row.

Tie a few half-hitch knots and cut off all the remaining thread.

The bead is finished.
