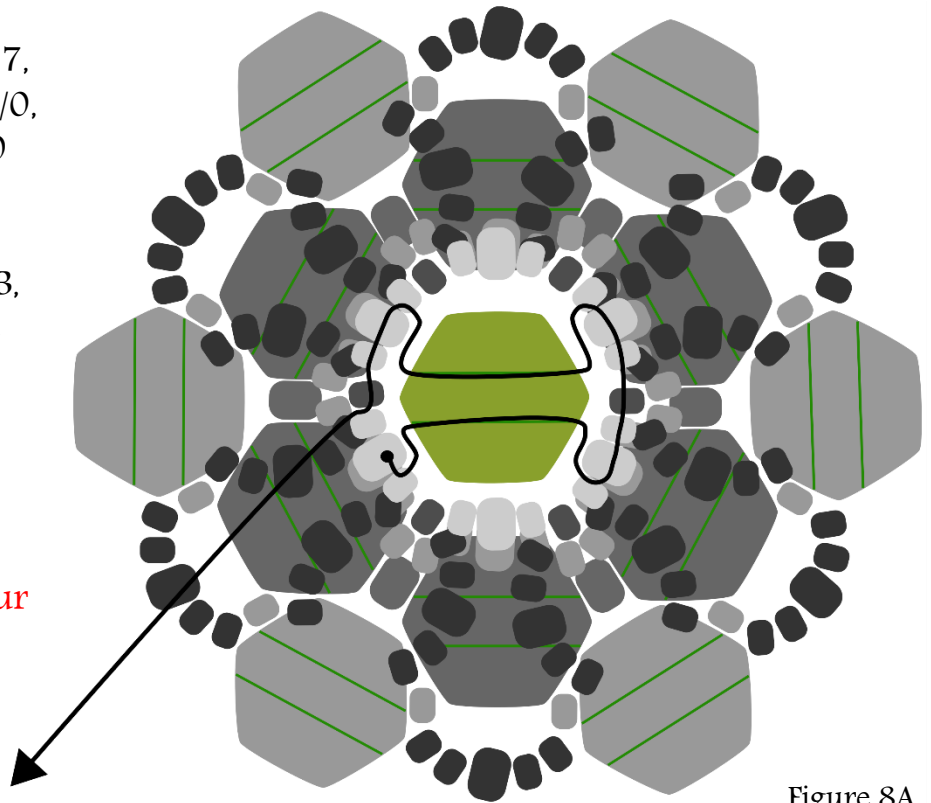

Figure 8A

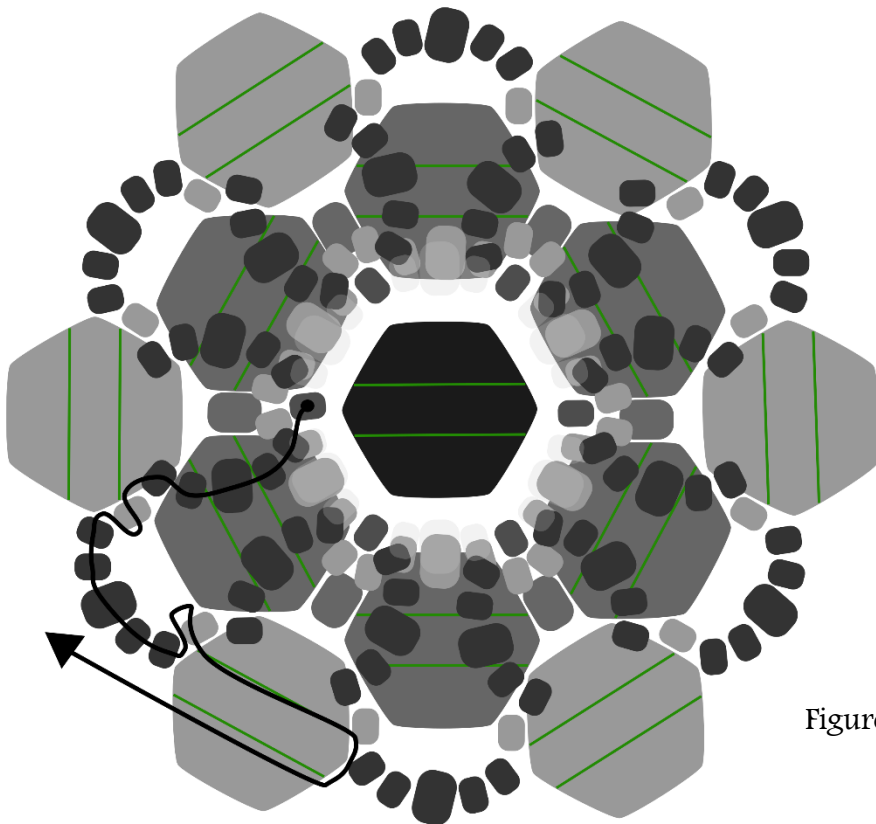

Figure 8B

Step 8B - Figure 8B

Go through all the beads again, repeating the same thread path, come out the second hole of a HCB of step 5.

In this illustration some beads have been made transparent to show the thread path the best!

This illustration will be rotated so that the HCB where you're coming out of will be horizontally. See figure 8C.

Step 8C - Figure 8C

Illustration 8C rotated.

Step 9 - Figure 9 - Clasp part one (you will be repeating this step just two times for two elements)

String on 1 x 15/0 - 11/0 - 15/0 -
11/0 - 15/0 - one part of your clasp
- 15/0 - 11/0 - 15/0 - 11/0 - 15/0,
go back, in the opposite direction

through the HCB. Go through all the beads again following the same thread path. Go back into
your beadwork, sewing back and forth to secure your thread. When your thread is secure
enough, tie it of. Do the same to your end thread.

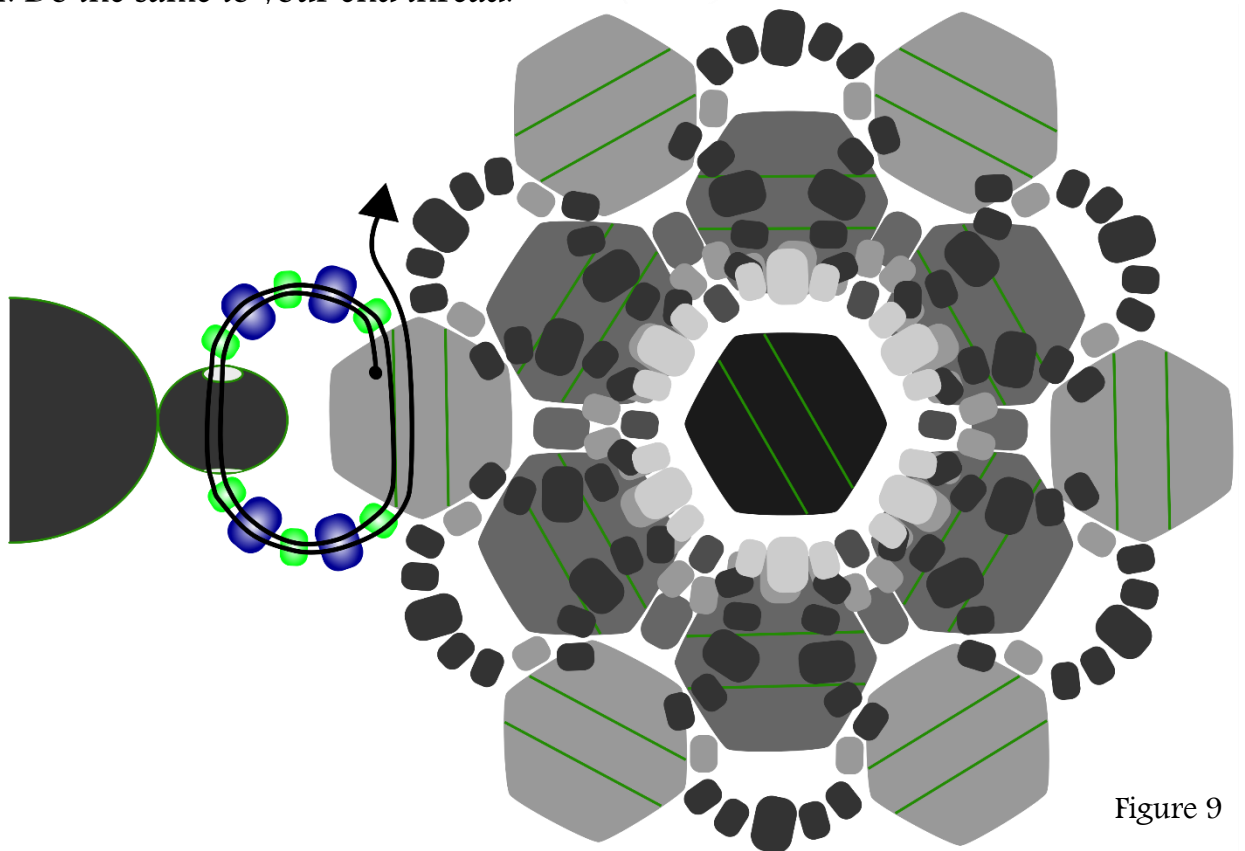

Figure 9

Step 10 - Figure 10

Make a second element, repeating steps 1 to 4.

In step 5 you will be replacing one of the HCB with a HCB of the first element. You will be picking the one that sits straight across from the one you attached your clasp on. In the next elements it will be the HCB instead of the clasp.

Then go further with steps 6 to 8 but skip the part of coming out of the HCB, you will be tying off your thread in this step when your thread is secure enough by weaving back and forth in your element.

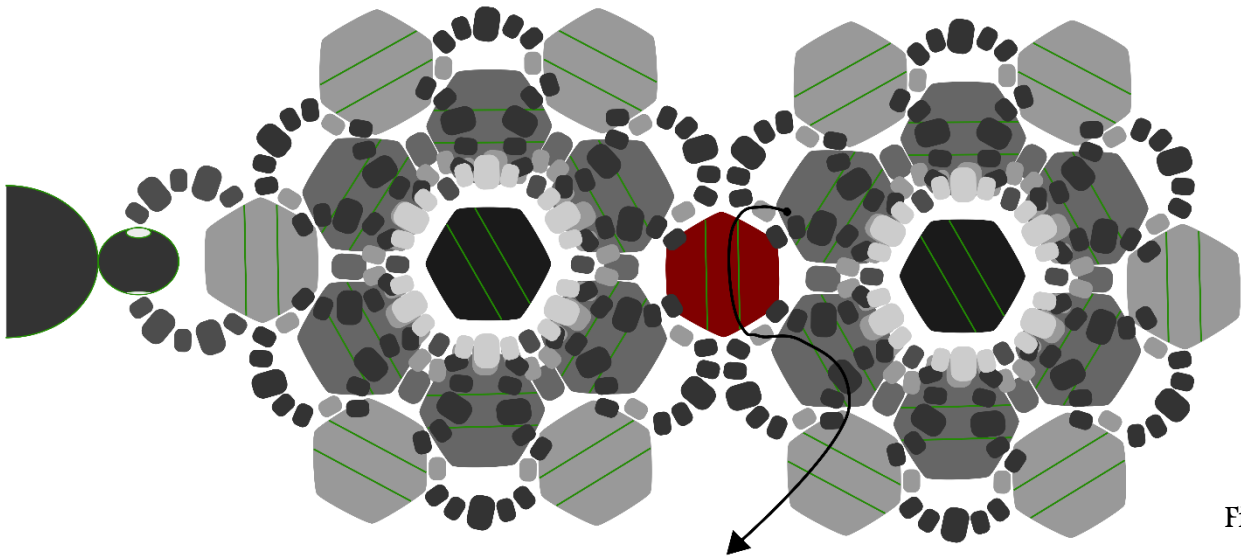

Figure 10

Step 11 - Figure 11

Repeat step 10 for the rest of the bracelet. Make sure you repeat step 9 with the last element. This includes the second part of your clasp. On the next page you will find an enlarged illustration of this step.
