Beading Needles  
Toggle Clasps (Antique Gold) : 1set  
Dura-Line K5475: 1 pc

1) Use 5.5m of Dura-Line. Put a stopper bead on the middle of the 5.5m line. Thread a needle.

Dura-Line is slick so you can thread beads smoothly but also a Dura-Line single knot is easy to untied. We prefer using double knots as follows.

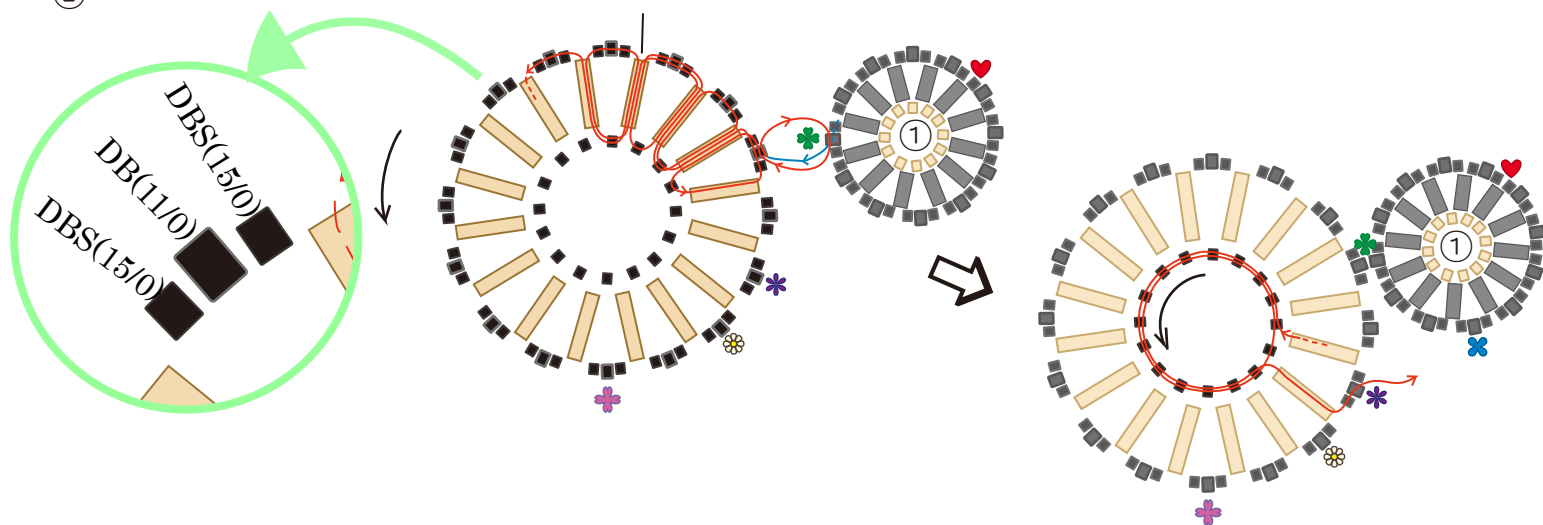

2) Start threading Delica Beads and Slender Bulges as follows. Please leave the thread tail after you finish ⑥.

3) Remove the stopper bead. Thread beads on the opposite side of Dura-line (2.5m) in the same way as 2). See patterns as follows.
