The Kite design can start with 3 Beads (Skinny Point) or 4 Beads (Broad Bottom).

In this design I used the 4 Bead start as I stitched in a Wire Guard to attach the ear hook to the kite.

Kites feature a herringbone core just like the warped shapes, but unlike the warp shapes, you are not stitching in the round but back and forth. To achieve this the design uses a mix of odd and even count peyote.

There is a step by step graphic to get you started.

## Stitches Used

**Peyote** - an off-loom beading technique, it can be worked with either an even or odd number of beads per row.

**Herringbone** - a versatile, unique off-loom bead technique. Also known as Ndbele Weave for its use by a South African tribe of the same name, the stitch is characterised by its snakeskin feel and visible chevron pattern.

# How to Stitch a Kite - Odd Count Turn

## Step One:

Thread around 80cm-1m of thread on your needle and pick up the first 4 beads (Row 1 & 2 on the word chart).

This is the start of the herringbone core for the kite.

## Step Two:

Pass your needle back through all of the beads and form a square (stack of 2 beads on top of each other). This is the herringbone core.

You can use the tail thread to create a knot with the working thread or stitch through again to reinforce these beads

## Step Three:

This is the even count side of your kite.

Pick up the first bead listed in Row 3 (shown in yellow) and pass your needle through the bead above it - in this case the top row of the herringbone core

## Step Four:

Adding beads to the Herringbone core, pick up the bracketed beads in Row 3. These are the two beads in the ().

Pass the needle back down through the opposite side of the top herringbone core that your thread is exiting from.

The new beads should sit on top of the herringbone core as shown in yellow.

## Step Five:

This is the odd count side of your kite. In order to add the final bead in Row 3 you will need to use the odd count peyote turn.

Pick up the bead (shown in yellow), pass the needle up through the first two beads in the herringbone core, then down through the neighbouring bead in the herringbone core and out through the first green bead in the herringbone core and then back up through the bead added at the start.

## Step Six:

Pick up the first bead in Row 4 (shown in blue) and pass your needle through the bead above it - in this case it is the top row of the herringbone core.

## Step Seven:

Adding beads to the herringbone core, pick up the bracketed beads in Row 4. These are the two beads in the ().

Pass the needle back down through the opposite side of the top herringbone core that your thread is exiting from.

The new beads should sit on top of the herringbone core as shown in blue.

## Step Eight:

Pick up the final bead in Row 4 (shown in blue) and pass your needle through the bead below it - in this case it is the bead added in step three.

## Step Nine:

Adding the beads from Row 5 to the kite as shown in yellow

## Step Ten:

Adding the final bead in Row 5 using the odd count peyote turn.

Pick up the bead (shown in yellow), pass the needle up through the neighbouring bead and the bead above it, then down through the neighbouring bead you just exited from and then out through the bead next to the one you added (first bead in the pass up) and then back up through the bead added at the start.

## Step Eleven:

Adding the beads from Row 6 to the kite as shown in blue

# How to Stitch a Kite - Odd Count Turn

## Step Twelve:

Repeat steps Nine to Eleven until you have added Rows 7 to 30 to your kite

## Step Thirteen:

Add the beads for Row 31 (shown in yellow) after you have added the herringbone core as this is where we will add in the Wire Guardian

*If you prefer to stitch your Ear Hooks in with 15/0 seed beads, then stitch in the Ear Hook and skip to Step Fifteen.*

## Step Fourteen:

Adding the Wire Guardian.

To stitch in the Wire Guardian, pass your needle up through the base of the guard over the top and down through the other side, pass the needle down through the top of the herringbone core (blue). Pass the needle back up through the the neighbouring herringbone core (yellow) and back through the wire guardian and out the herringbone core.

You may wish to repeat this for a total to 3-4 circuits.

## Step Fifteen:

Adding the rest of the beads for Row 31.

Once you have completed the odd count turn at the end, tie off your thread.

Add the Ear Hook to the wire guardian and repeat the process to make the other earring.

# How to Stitch a Kite - Skip a Bead

Follow Steps 1-9 of the Odd Count Turn.

## Step Ten:

Instead of a full figure 8 turn, you will need to make a half 8 turn, with the thread exiting from bead 1, pass through bead 2, pick up a bead (3) (the final bead in Row 5) and pass the needle back up through bead 1 and then bead 4.

In this step, you will have skipped adding a bead next to bead 1

## Step Eleven:

Adding the beads from Row 6 to the kite as shown in blue. You will be missing the first bead in this row.

## Step Twelve:

Adding the beads from Row 7 to the kite as shown in gold.

You will skip the second bead on the odd count side.

## Step Thirteen:

Repeat steps Ten to Twelve until you are on the last row.

## Step Fourteen:

In the final row on the odd count peyote side, you are simply adding the edge bead at the base and filling in the blanks on the way back up to the herringbone core where you will add the wire guardian

(See Step 14 in the odd count turn for how to add the wire guardian)
